- Selection of Fish – Freshwater/Saltwater
- Lighting
- Plants and Decorations
- Filtration & Aeration
- Care, Maintenance and Feeding

WATER QUALITY

- Nitrosomonas
- Nitrobacters
WATER QUALITY

Selection of Aquarium Size and Shape

- Which type of fish
- Home space availability
- Budget

The simple answer is: A quality aquarium that is the largest you can afford within your budget and space. It doesn’t have to be fancy; it just needs to be the right size for the beautiful fish you choose to keep.

Corner Aquarium
• Glass is standard
• Acrylic allows creativity
Lighting
- Fluorescent
- LED

PLANTS AND DECORATIONS
- Create a natural living underwater world
  - Plants: Live and Plastic
  - Rocks: Create caves
  - Natural Wood
  - Corals: Saltwater

NATURAL HABITAT
FILTRATION & AERATION

• The Heartbeat of the Aquarium
• Mechanical—Biological and Chemical
• Cleans Water to Keep Harmful Microorganisms and Parasites from Proliferating
• Increases Oxygen to support fish, plants and beneficial bacteria
Care, Maintenance and Feeding
- Water Testing
- Routine Partial Water Changes
- Algae Growth Removal
- Daily Feeding

Water Testing

Routine Partial Water Changes
