Introduction to Hazardous Waste Management
May 25 & 26, 2010
$385 registration fee; $355 multiple
Course Code: EZ0501CA10

The maze of complicated hazardous waste rules and regulations can seem overwhelming. Let us give you a road map! In two days, we’ll cover the important aspects of current federal and New Jersey hazardous waste regulations and show you “real-world” examples of facility compliance programs. You’ll get practical information that you can use as soon as you get back to work. Whether you’re new to environmental compliance or just need to brush up on your skills and get the latest information, this course has everything you need in one convenient package!

Who Should Attend?
This course will benefit corporate and plant level environmental staff; environmental consultants facilities personnel environmental health and safety managers and all personnel who are responsible for any component of hazardous waste generation and/or disposal.

What Will You Learn?
This course will cover all the information you need to implement a successful compliance program including:
- Definitions of hazardous waste; regulatory exemptions and exclusions
- On-site waste storage and container management requirements
- Off-site waste disposal requirements
- Recordkeeping, reporting, inspection and training programs
- Waste minimization/source reduction plans
- Used oil and universal waste management standards
- Agency inspection and compliance enforcement policies

Course Coordinator
Ms. Melanie Powers, CPEA, is a Principal with Specialty Technical Consultants, Inc. She has over 19 years of experience in environmental consulting. Her areas of expertise include environmental compliance and management systems, auditing and compliance program development. In addition, representatives of the NJDEP will participate and be available for questions.

Credits and Continuing Education Units
In addition to Rutgers CEUs, credits are available for:
- NJ Health Officers & REHSs - Approval Pending
- NJ Licensed Water & Wastewater Operators (Approval #01-020202-30) - 12 TCHs

Office of Continuing Professional Education
New Jersey Discharges of Petroleum and Other Hazardous Substances

June 3, 2010

$245 before 5/20; $275 after; $215 multiple
Course Code: EL0201CA10

In September 1991, the New Jersey Department of Environmental Protection (NJDEP) enacted the Discharges of Petroleum and Other Hazardous Substances (DPhS) rules (N.J.A.C. 7:1E et seq). These rules require all major facilities in New Jersey to prepare and submit Discharge Prevention Containment and Countermeasure (DPCC) plans and Discharge Cleanup and Removal (DCR) plans. This one-day workshop will provide guidance to prepare, submit and secure approval of your DPCC/DCR plans, as well as what is required to be in compliance with the rules’ technical standards.

Topics Covered
• Overview of the NJ Spill Compensation and Control Act & DPhS Rules
• Technical Standards in N.J.A.C. 7:1E
• Development and Maintenance of DPCC and DCR Plans
• Approval Process for DPCC/DCR Plans, Amendments and Renewals
• Requirements for Discharge Notification, Response and Reporting
• Environmental Sensitive Areas Protection Plans
• NJDEP Procedures for Annual Audits and Post-incident Inspections
• Preventative Maintenance, Facility Inspection, Personnel Training and Operating Procedures Requirements

This program will also present a review of the most recent Spill Prevention, Control and Countermeasure rule proposals and amendments.

Course Coordinator
Ms. Melanie Powers, CPEA, is a Principal with Specialty Technical Consultants, Inc. She has over 19 years of experience in environmental consulting. Her areas of expertise include environmental compliance and management systems, auditing and compliance program development.

Instructors
Representatives from the NJDEP - Bureau of Release Prevention and EPA Region 2 are expected to serve as key speakers for this seminar. In addition, EHS professionals will provide attendees with practical guidance for implementing and maintaining DPCC/DCR Plans and compliance programs.

Underground Storage Tanks
NJDEP's Regulatory Training
June 22, 2010

$260 before 6/8; $285 after; $240 multiple
Course Code: EW0201CE10

The NJ Department of Environmental Protection (NJDEP) regulates Underground Storage Tanks (USTs) and requires the professionals who work on them to be trained, certified and recertified every three (3) years. Effective November 4, 2009, a regulated UST owner or operator who “initiates remediation” (see N.J.A.C. 7:26C-2.2(b)) on or after this date is required to engage the services of a Licensed Site Remediation Professional (LSRP). The services of a Certified Subsurface Evaluator, or a LSRP for cases that “opt-in” to the LSRP Program, are required for regulated UST remediation initiated prior to November 4, 2009. All other categories of service, including closure, are in place.

*For more information and clarification on how the LSRP Program affects UST requirements, please call Wayne Howitz from the NJDEP at 609-984-1351.

For information concerning the UST exam, please contact the NJDEP Examination and Licensing Unit at 609-777-1013.

If you work on USTs, you need this course! Whether you are becoming certified for the first time or just need to recertify, you will get the regulatory information you need to stay current with New Jersey’s UST requirements and help your clients or employer avoid potential penalty liability.

Who Should Attend?
Anyone working on USTs needs a good understanding of the applicable regulations and guidance, especially tank owners, consultants, engineers, contractors, health officers, geologists, soil scientists and attorneys. If you are renewing your certification, you must take a NJDEP-certified course within one year prior to renewal. Professional engineers and plumbing contractors, exempt from the certification examination, must attend the course within one year of certification.
