*Viburnum nudum* var. *nudum* (Possum Haw)

*Viburnum lentago* (Nannyberry)

*Viburnum prunifolium* (Blackhaw)

*Vitis labrusca* (Fox Grape)

**\*Always identify the exact plant species before eating; not all species in the same genus may be edible. In some cases, seeds or pits may not be edible or may be problematic if eaten in large quantities. Some plants, like cactus, require special cleaning before eating. Always research before foraging.**
