

11th Annual q-bio Conference

July 26-28, 2017

Rutgers University | New Brunswick, NJ

Pre-Conference Tutorials: July 25th | Conference: July 26th, 27th, 28th

*The **q-bio** community emphasizes the integration of theory, computation and quantitative experimentation to understand, predict, and control biological phenomena.*

This exciting summer conference offers opening and closing banquets, plenary and contributed talks, poster spotlight, two evening poster sessions, discussions framing grand challenges, and opportunities for networking and fostering collaborations. The structure of the event and its coordination with the q-bio summer schools promotes rich interactions among students, postdoctoral scholars and faculty.
