Radon is a radioactive gas that comes from the breakdown of naturally occurring uranium in soil and rock.

**Radon is Invisible • Odorless • Tasteless**

**Radon is**

- The 2nd Leading Cause of Lung Cancer in the United States
- The Leading Cause of Lung Cancer for Non-Smokers
- Responsible for up to 22,000 Deaths per Year

**Take Action! Test Your Home!**

Homeowners can test for Radon themselves or hire a New Jersey Certified Radon Measurement Company.

Test Kits are available from Hardware Stores, Local Health Departments or Certified Businesses.

**Mitigate Your Home!**

The New Jersey Department of Environmental Protection recommends you mitigate your home if your test results indicate radon levels of 4 pCi/L or more.
